INTRODUCING THE APOLLO RACE TEAM

Apollo will sponsor two race teams in 2010 – an Under 23 Road Team of six riders who will compete in 10 events around Australia, and an Elite MTB Team, which will race in the National MTB Series.

For rider updates and results, visit www.apollobikes.com/team

APOLLO RACE TEAM CLOTHING

Introducing for the 2010 season brand new Apollo Race Team clothing. Made from ultra high quality fabrics, with new comfortable shapes and cuts.

APOLLO SHORT SLEEVE TEAM JERSEY
AVAILABLE IN S, M, L, XL

APOLLO TEAM BIB KNICKS
AVAILABLE IN S, M, L, XL

APOLLO TEAM ARM WARMERS
AVAILABLE IN S, M, L, XL

APOLLO TEAM HELMET
AVAILABLE IN S/M, L/XL

OUR HERITAGE

From Apollo's famous I, II and III race models in the early 1980's, through to our brand new Arctec Series, performance and quality is our heritage. Designed and developed right here in Australia, for Australians, by Australians, the Apollo 2010 range is the latest in our proud 30 year history. Every model is developed in-house; designed, developed, tested and approved by Apollo for riders who are passionate about their bikes and demand nothing but the best.

We also have a long history of supporting the sport of cycling, with an honour roll of the very finest riders – from Cadel Evans, and Eddie Salas(9 times Australian Road Champion), through to Keith Oliver(Sun Tour winner and 12 times World Vet Track Champion). From the first Australian MTB Championships in 1994 to the Noosa Tri 2009 and the Tour Down Under 2010, we are there. Why? So our product is of a standard to compete with the very best, and win.

Test ride an Apollo today. You won't be disappointed.

APOLLO FRAME & COMPONENT TECHNOLOGY

Carbon monocoque frames are constructed as a single piece design and utilise the bladder moulding technology. This method of frame construction removes the need for lugging, fusing or bonding of several carbon tubes that can often lead to weaknesses and vulnerabilities around seams.

Apollo's custom hand-made carbon frames utilise carefully designed layers of Hi-Modulus carbon fibre, engineered to deliver a precise balance between torsional stiffness, strength and flex.

TCM are dynamically designed rear stays, shaping into a single piece before meeting the front triangle of the frame. This construction forms a rigid connection that enhances torsional strength and stiffness within the overall frame.

These specifically designed seat stays are constructed to reduce and absorb shocks and vibrations from the road surface, leading to a more comfortable ride.

Hydroforming is the process of shaping aluminium tubing by using pressurised hydraulic fluid, giving the tubing a higher stiffness to weight ratio. By using the T4 Hydroforming construction on select Apollo models they are stronger and stiffer in the stress points of our frames.

Triple butting uses taper technology to control the thickness of tubing that minimises its weight without sacrificing strength at the tubes stress points. This technology together with the benefits and features of hydroforming above produces extremely lightweight and strong tubing that we use on our T5 front triangles.

Specific models throughout the 2010 range feature Apollo's custom moulded, 6061 heat-treated alloy tubing. These tubes have been engineered for aerodynamics and strength, with the overall result being a high performance alloy frame.

Look for the symbol above to find our 2010 models that are designed from the ground up specifically for women riders. Each model has been tailored with custom frame geometry, lower stand-over height, comfort saddles and ergo shaped grips to ensure maximum comfort.

For 2010 Apollo launches the Factor series of stems, handlebars and seatposts. These ergonomically designed parts are created using the latest technologies and undergo rigorous strength and flex testing. The extensive range of parts features prominently throughout the entire model range from Urban through to Mountain bikes.

MY GOALS. MY APOLLO.

Where will it take you?

ROAD

2010 sees a quantum leap forward in bicycle design with our bikes offering unprecedented levels of performance. We deliver where others don't, offering new lightweight framesets at every level starting with our new high performance monocoque carbon frame through to the triple butted Performance model.

This year, we're proud to reveal an entirely new range of bikes that has been in development for a number of years - the Apollo Arctec Series. The Arctec R is aimed at the serious road rider, giving them all the tools they need achieve their goals, then set the bar higher for their next ride.

MY STREETS. MY APOLLO.

Where will it take you?

URBAN

Sick of waiting in traffic on your way to work each morning? These slick and slim bikes are designed for speed and agility; perfect for keeping you ahead of the traffic on the streets. Forget congested traffic, searching for a parking spot, rush hour and parking fines altogether; the only thing you need to worry about is which shortcut will get you there faster.

Our 2010 Urban range sees the introduction of 10 new models, including an all carbon fibre commuter frame, two 8 speed Nexus models, two brand-new models featuring suspension forks with 700c tyres, then contemporary and retro collide with the stylish Apollo Classic Series fixed speed road models.

MOUNTAIN

Strength and agility, prime requisites of the MTB rider. Whether you're scaling rough terrain or descending from great heights, Apollo's 2010 range consists of the perfect bikes for every level of rider. Our rugged Australian landscape provides the perfect locations for MTB riding and Apollo has been helping Australians conquer their mountains for over 30 years. So whether you're new to mountain biking or a seasoned pro, let Apollo help you blaze a trail.

This year, we are proud to reveal an entirely new high-end mountain bike in our lineup. The ARCTEC M is aimed at the serious mountain bike rider, offering cutting edge frame and component technology allowing you to ascend to your full potential.

LIFESTYLE

Our 2010 Lifestyle range sees the introduction of five new models, including two 7 Speed Nexus models, one additional folding model and two electric bicycles with battery operated pedal assist to take the sting out of those hilly areas.

Lifestyle bikes are perfect for those trips to your favourite cafe, or a pedal along the local bike path. These bikes combine comfort, style and function to create the ideal choice for the rider who wants to get where they are going in their own time. Relax and take in the scenery in style.

YOUTH

Apollo's 2010 youth range is perfect to help your fast growing kids transcend the gap between juvenile and adult riding. With revamped graphics for a more adult look, your kids will feel as much a part of the fun as you. These bikes are designed to grow and adapt as much as your kids will. At the park with friends, or on their way to school, let your kids play by their own rules with the 2010 Apollo youth range.

Where will it take you?

MY BIKE. MY APOLLO.

Where will it take you?

See Owner's Manual for warranty details. Due to Apollo's continuing program of product improvement specifications may change without prior notice. Some bikes in this catalogue are photographed without reflectors and bells, but all Apollo bikes comply with AS/NZS 1927 - 1998.

IMPORTANT WARNING: Some of the bicycle actions depicted throughout this catalogue are dangerous and are performed by stunt or experienced professionals. These actions are not intended or recommended for use by the local distributor - refer to the Owner's Manual. Riders should always wear appropriate safety gear & ride within their own capabilities. The bicycles depicted may differ in appearance or specifications from those sold in Australia & New Zealand, due to Australian standard requirements or as a result of modifications for competition.
