

ROAD OVERVIEW

The 2012 Apollo road range continues to build on the momentum of the 2011 road models with advancements in our carbon and frame technology. The Apollo range is designed to exceed the expectations of riders in a diverse and expanding road market by specifically tailoring our bikes to Australian conditions. Outlined below are the innovations and upgrades for the 2012 road range.

- Redesigned TT models, already on the podium with VIS Team riders
- Brand new cyclocross model, Apollo XACT
- Lighter carbon layup in Ultra and Vispo frames
- Redesigned alloy road models feature smooth welding with a stiffer frame and fork

URBAN OVERVIEW

The Australian urban cycling community is expanding rapidly, and many now take a more environmentally friendly approach to commuting. The 2012 Apollo Urban range allows riders of all kinds to contribute, whether riding to work, activities with the family or simply for fitness and recreation.

- Improved and upgraded frames across the line up
- New, streamlined flatbar range
- Trace 4.0 featuring new Shimano Alfine 11
- All-new womens Trace and Transfer models for slick city riding or all-round trail riding
- The popular Classic range now has a few new additions - an all new mens specific model, a new Nouveau, and a classic mixtie.

MOUNTAIN OVERVIEW

For 2012 Apollo has created an exciting and well-rounded MTB range, headlined by our cutting edge Terra 30, and the addition of two all new 29 models. The 29ers tap into the growing endurance market and open up competitive mountain bike riding to a greater audience. Significant upgrades to frame technology and specifications feature across the range to create our most complete and exciting MTB lineup yet.

- A new Apollo full carbon fibre 100mm dual suspension frame
- Expanded 29er range
- Press-fit BB30 on high end alloy models
- Frame upgrades across alloy MTB range
- Redesigned womens MTB models

TERRA 30

OIC (OPTIMISED INSTANT CENTRE)

THE OIC SYSTEM CREATES A TRAVEL PATH THAT PROVIDES SUPERIOR RIDE WITH MINIMAL BOB AND PEDAL FEEDBACK

OIC IS DESIGNED TO MOVE FROM A LOCATION NEAR THE HEIGHT OF THE MIDDLE RING, TO A LOCATION CLOSER TO THE BB CENTRE. THIS MAKES THE BIKE PEDAL WELL CLOSE TO THE SAG POINT WHILE ELIMINATING THE INFLUENCE OF BRAKING ON THE SUSPENSION PERFORMANCE.

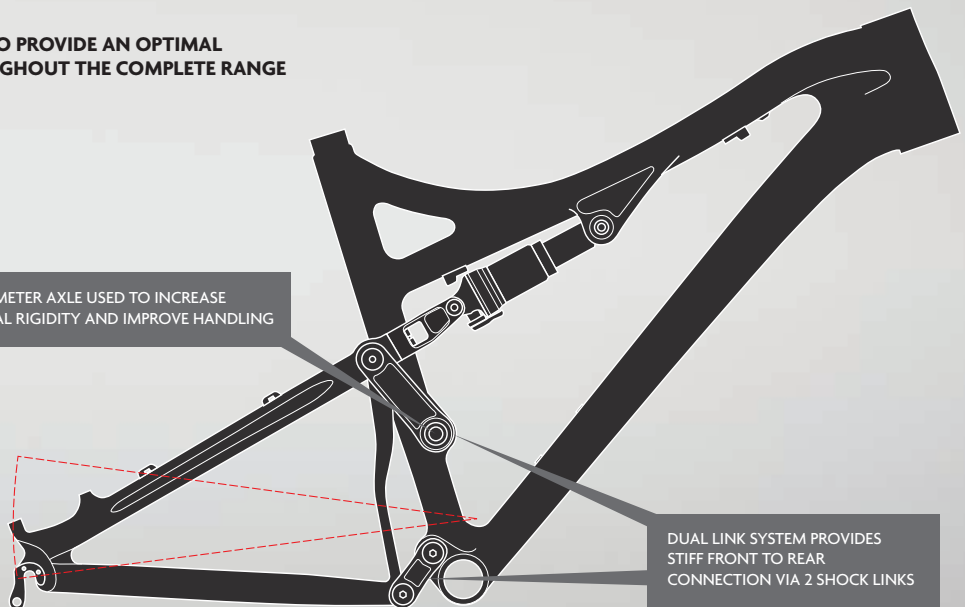

OIC IS THE LOCATION OF THE INTERSECTION OF THE LINKAGE VECTORS AND IS AN INFLUENCING FACTOR IN PEDAL BOB AND BRAKING CHARACTERISTICS.

THE LINKAGE SYSTEM IS DESIGNED TO PROVIDE AN OPTIMAL MIGRATION FOR THIS POINT THROUGHOUT THE COMPLETE RANGE OF TRAVEL.

THE INSTANT CENTRE SYSTEM IS ENGINEERED TO HAVE LINEAR SHOCK RATE. THIS CHARACTERISTIC ALLOWS SHOCKS TO BE TUNED TO SUIT A WIDE RANGE OF RIDING STYLES AND TERRAINS.

THE OIC LINKAGE SYSTEM IS DESIGNED TO MINIMISE SHOCK EXTENSION AND COMPRESSION UNDER PEDALING LOADS, REDUCING PEDAL FEEDBACK AND PROVIDING A MORE SUPPLE RIDE.

LARGE DIAMETER AXLE USED TO INCREASE STRUCTURAL RIGIDITY AND IMPROVE HANDLING

DUAL LINK SYSTEM PROVIDES STIFF FRONT TO REAR CONNECTION VIA 2 SHOCK LINKS

MOUNTAIN - DUAL SUSPENSION
